Pediatrics: Neuro-Oncology Treatment + Imaging

Treatment

CNS Embryonal or Germ Cell Tumor

Newly Diagnosed

Recruent or Refractory

No Trials Currently Available

IRB#5056 Phase I/II study involving Melphalan and Carboplatin with Blood-Brain Barrier opening and Delayed Intravenous Otoprotective Sodium Thiosulfate

Imaging

Newly Diagnosed or Relapsed

Pediatric Brain tumor or other brain lesion

IRB#5405 Phase I/II Study involving DSC-MRI with Ferumoxytol and DCE-MRI with Gadolinium to image vascular properties of pediatric brain tumors
